

Demolition Permit

Application and Instruction for Demolition Permit

One Backfill Inspection is required (final) on your project. The Backfill Inspection will take place when all material and debris is removed from the property and prior to filling in of any excavation. Other Agencies may be involved after the fact, such as the Saginaw County Health Department and Department of Environmental Quality (DEQ). Therefore the Building Official must be able to document that the materials have been removed and the excavation is clean of any material prior to backfill.
